PART A – General Details

1) Branch	Owls - registered	2) Batch Number of the Branch	Colombo branch 2024/2025/CO/SE/Intake26
4) Participated Candidates List			
Name of Candidate		Signature	
1. J.M. Kithmini K Jayawardhana			
Start Date	27. 09. 2025	End Date	29. 09.2025

PART B – Fulfil the requirements of Section A of the assignment – H7DJ 04/AS/01

1. Name of the Business Model	JAY STACK
2. Brief Description of the Business Model - (250 Words)	

JAY STACK

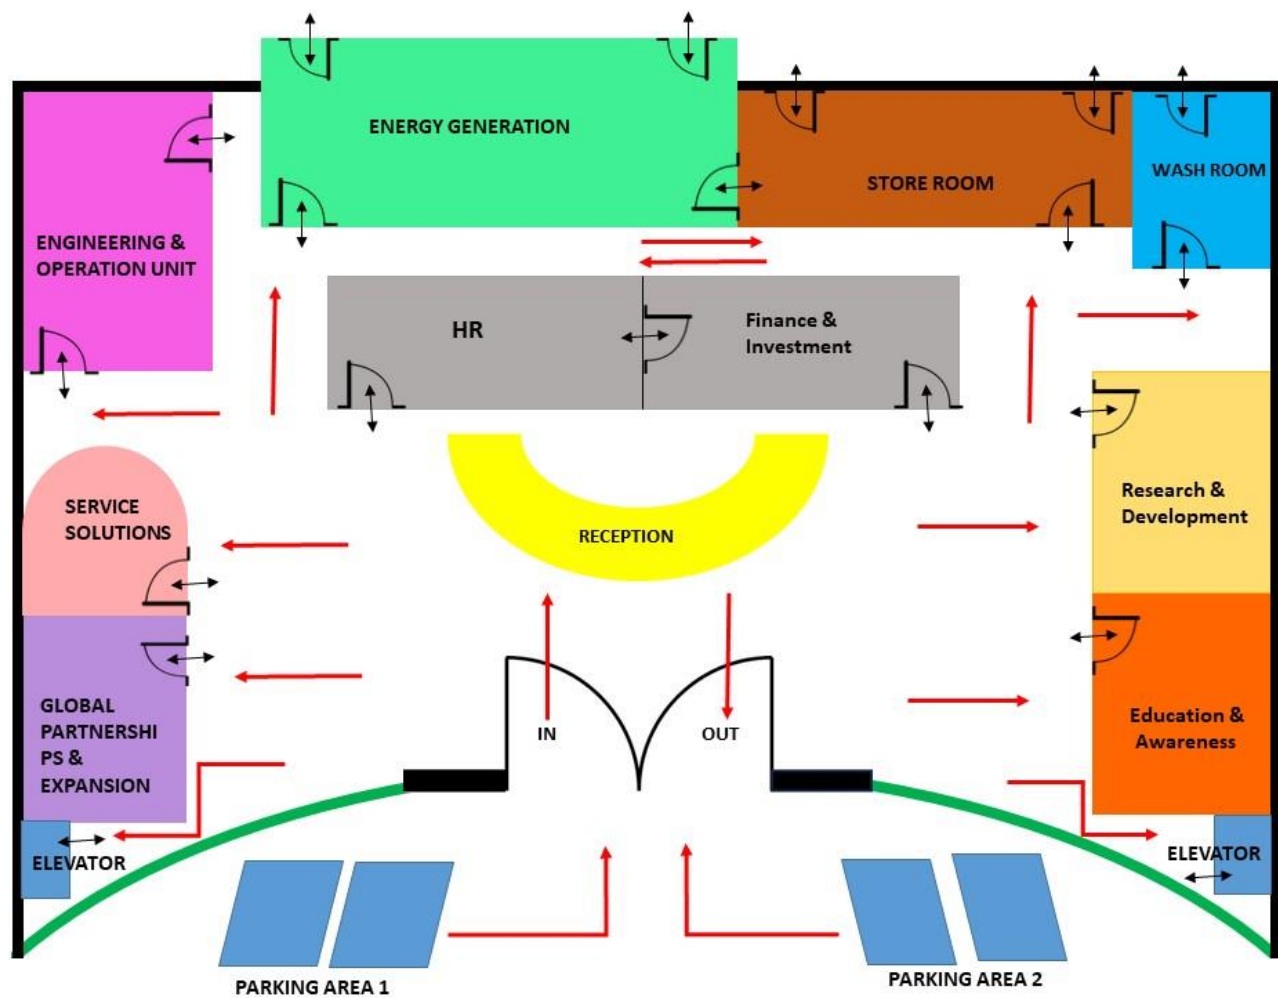

Jay Stack is an emerging energy company founded with the vision of becoming a global leader in renewable and sustainable energy solutions. With our head office based in Sri Lanka, we are committed to addressing the growing demand for clean, affordable, and reliable energy while contributing to global climate goals. Our business model focuses on four type areas

- **Renewable Energy Generation** - Jay Stack invests in solar, wind, hydroelectric, and biomass initiatives to produce power from sustainable sources. Our goal is to power homes, businesses, and governments at affordable prices while decreasing our reliance on fossil fuels and carbon emissions.
- **Innovation and Technology:** We develop and apply innovative solutions like energy storage systems, smart grids, and AI-based energy monitoring. We optimize efficiency, guarantee grid stability, and provide scalable solutions appropriate for domestic and global markets through applying innovation.
- **Global Partnerships and Expansion:** Jay Stack seeks to enter both regional and global markets, beginning in Sri Lanka. By means of smart collaborations with governments, international investors, and renewable technology firms, we will expand our influence and forge a robust worldwide footprint.
- **Services and Solutions –** Jay Stack offers installation, consultation, and maintenance services in addition to energy generation. We develop specialized renewable energy solutions that allow governments, communities, and companies manage the switch to clean energy.

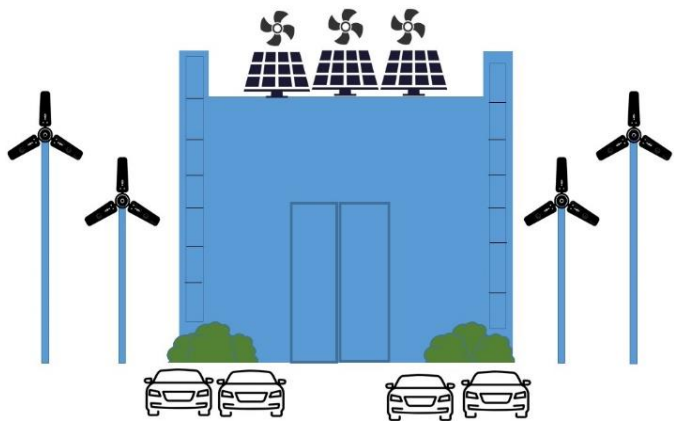

Our revenue model is diversified across energy sales, technology licensing, service contracts, and joint ventures. This results in a well-rounded strategy that promotes sustainability and guarantees revenue.

Jay Stack wants to grow from a Sri Lankan business to a reputable international corporation in the long run. Our goal is to provide cutting-edge renewable energy solutions globally while also empowering people and safeguarding the environment.

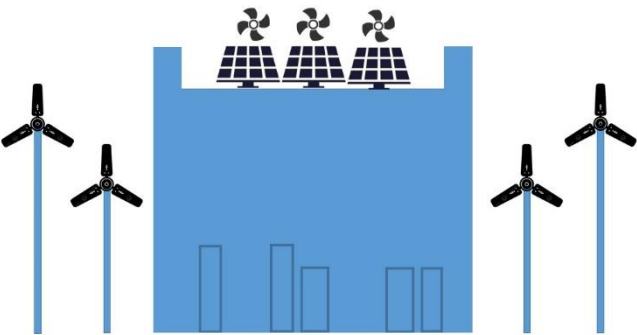

3. Descriptions of the components of the Business Model (Minimum of 8 components) Components of the business can be as follows : Department - candidates can demonstrate the departments from the business model Segments – candidates can divide areas of the business model in the segment example a supermarket can have a billing area, food court, meet shop, children playing area (kids' Corner), pharmacy, parking area
